

**Whatever directs the mind towards expansive
Avenues of thought, aids in the process of
Awakening dormant aspects of the inner self;
That which springs from the focused energies
Of imagination, provides a unique insight into
Veiled aspects of worlds beyond comprehension;
These rare insights providing a fleeting glimpse
Of realms beyond common experience; to what
End moments of introspective thought serve to
Expand the mind, may not appear obvious at first;
Though experiences of a profound nature serve
To ignite the divine spark within all of creation
Acting as a catalyst for genuine transformation.**
